

# DOCK SHELTER

## Raked header

Diverts water off sides of unit.

## Durable head curtain

Rests with pressure on top of trailer, creating full-height clearance inside trailer.

## Rugged Armor Pleats

On corners of head curtain help extend product life. Available in extra tough, friction-resistant fabric for ultimate wear.

## "Twistable" fiberglass stays

Resist cracking or breaking to maintain positive side curtain pressure against trailer. Stay ends are rounded and capped to prevent curtain wear-through.

## Guide arrows

Direct trailers for easier on-center positioning.

## Treated wood backer

Resists rot and decay .

## Heavy-duty steel bumpers

Support and protect side frames.

## GET FULL ACCESS AND ECONOMICAL ENVIRONMENTAL CONTROL.

Rigid frame dock shelters provide both a form-fitting perimeter seal for the top and sides of docked trailers and full, unobstructed access to loads for efficient material handling.

Provides basic shelter protection, for year-round energy conservation and a more comfortable working environment.
